

The Ultimate SAT Study Plan

An 8 week, week-by-week prep schedule for students aiming 1400+

■ 8-Week Study Schedule

Week	Focus Area	Daily Target	Key Activity
Week 1	Diagnostic & Baseline	2 hrs/day	Full-length diagnostic test
Week 2	Math — Algebra & Data	2 hrs/day	50 practice Qs/day
Week 3	Math — Advanced Topics	2 hrs/day	Timed section drills
Week 4	Reading — Passage Strategy	2 hrs/day	5 passages/day + annotation
Week 5	Writing & Language	2 hrs/day	Grammar rule review + drills
Week 6	Mixed Section Practice	2.5 hrs/day	Full section timed mocks
Week 7	Full Mock Tests	3 hrs/day	2 full-length mocks + review
Week 8	Final Sprint & Review	2 hrs/day	Weak area focus + exam strategy

■ Top 20 Must-Know SAT Math Formulas

#	Formula / Concept	Notes
1	Distance = Speed × Time	Always check units
2	Slope = $(y_2 - y_1) / (x_2 - x_1)$	Rise over run
3	Quadratic: $x = (-b \pm \sqrt{b^2 - 4ac}) / 2a$	Discriminant $b^2 - 4ac$
4	Area of Circle = πr^2	Circumference = $2\pi r$
5	Area of Triangle = $\frac{1}{2} \times \text{base} \times \text{height}$	For right triangles
6	Pythagorean Theorem: $a^2 + b^2 = c^2$	Right triangle only
7	Average = Sum / Count	Mean formula
8	Percent Change = $(\text{New} - \text{Old}) / \text{Old} \times 100$	Always as %
9	Simple Interest = PRT	P=principal, R=rate, T=time
10	Compound Interest = $P(1 + r/n)^{nt}$	n=compoundings/yr
11	Vertex of Parabola: $x = -b/2a$	For $ax^2 + bx + c$
12	Linear Equation: $y = mx + b$	m=slope, b=y-intercept
13	Sum of Angles in Triangle = 180°	Always true
14	Exterior Angle = Sum of two remote interior	Triangle property
15	Volume of Cylinder = $\pi r^2 h$	r=radius, h=height

16	Volume of Cone = $\frac{1}{3}\pi r^2 h$	One-third of cylinder
17	SOHCAHTOA	Sin/Cos/Tan definitions
18	30-60-90 Ratio: $1 : \sqrt{3} : 2$	Special right triangle
19	45-45-90 Ratio: $1 : 1 : \sqrt{2}$	Isosceles right triangle
20	Probability = Favourable / Total	Between 0 and 1

■ Reading Strategy Cheat Sheet

■ Read the question first

Before reading the passage, scan questions so you know what to look for.

■ Annotate as you read

Circle key claims, underline evidence, mark tone shifts.

■ Evidence pairs

For Evidence questions, answer the main Q first — then find the line that supports it.

■ Eliminate extremes

Answers with 'always', 'never', 'only' are almost always wrong.

■ Vocabulary in context

Re-read the sentence. The 'obvious' meaning is often a trap.

■ Paired passages

Read Passage 1 + answer its Qs first. Then Passage 2. Then comparison Qs.
